

Wartime Capital Jammed With Girls

Housing of Fair Sex Serious Problem.

WASHINGTON—Girls are people, all right, but landlords in congested Washington prefer money to them. Inasmuch as 150,000 government girls are already employed in the wartime capital, outnumbering the "eligible" men by maybe two to one, the situation would be serious enough even if the total were not constantly growing.

The civil service commission, the defense housing registry and the Traders' Aid society, after devoting a lot of thought to the question, have concluded that landlords do not like girl tenants because:

1. They are generally more trouble than men, require more "looking after."
2. They do their laundry in the bathroom, clogging drains, and causing queues to form at the bathroom door. They also swipe the landlord's current for their electric irons.

They oftenicker with each other and the landlord over use of the living room for entertaining their boy friends.

Girls in a boomtown present other difficulties. They tend, for one thing, to gang up and "stick together in the strange city," thus creating confusion, and producing a "grave" problem to the organizations attempting to meet their housing needs," according to the civil service commission.

As for "stories of girls sleeping on benches in railroad and bus terminals and of girls riding streetcars all night because they were unable to find a place to sleep," the commission said, "if such incidents have occurred, they may be attributed to the failure of these girls to go to the proper agency for advice and assistance."

Soldier-Sailor Is Back

In Navy at Age of 69

PEKIN, ILL.—Thomas W. Gardner, who has spent more than 30 of his 69 years in Uncle Sam's fighting forces, is going back into the navy with a big grin on his face.

Last July a routine letter notified Gardner, and all other men who have had extensive navy experience, that he might be subject to recall. From that day on he lived in hope that he could wear a sailor's uniform again.

Gardner, who retired in 1929 with the rank of chief boatswain's mate, was ordered on May 1 to report to Chicago for a physical examination. He got there the same day. He was accepted and was ordered to report to the Great Lakes Naval Training station.

In the World war, Gardner held chase submarines along the Atlantic coast. He'd relish that assignment again, but expects he'll be on duty in some training station in the navy. In the Spanish-American war Gardner enlisted in the army but didn't see any fighting. He was discharged for a three-year hitch in Montana and Wyoming. After that he became a navy man, enlisting in 1900 and serving 27 years.

Australia Wheat Surplus

Eyed as Fuel for Autos

MELBOURNE, AUSTRALIA.—A representative of the Melbourne Herald, after making a test run in an automobile with a gas producer powered by wheat instead of charcoal, thinks economic use is possible of Australia's wheat surplus of 6,000,000 bushels, equivalent to 18,000,000 gallons of gasoline.

The inventor, M. J. Martin, a chemical engineer, has driven a car several months on grain mixed with charcoal gas in a gas producer. A bushel of wheat is equal to three gallons of gasoline in mileage and costs five shillings.

Pardon Almost Breaks

Up Missouri's Home

KANSAS CITY.—Fred O. Reeves walked into a barrage of questions from his wife. The postman brought a letter from Governor Donnell granting Fred Reeves a pardon.

The former auto salesman, who'd never been in prison, took the letter to police.

They found the pardon was intended for another Fred Reeves.

Free Legal Advice Given

Soldiers at Camp Stewart

CAMP STEWART, GA.—When a soldier needs a lawyer—he's got a right. A soldier's legal aid clinic, composed of 15 lawyer-privates, is functioning at Camp Stewart. It follows the lead of Private Murray I. Greenbaum, is chairman of the group, which considers legal questions solidly during off-duty hours and charges no fees for its advice.

He Swallows a Worm

To Help War Effort

KOKOMO, IND.—Jefferson school is buzzing with the story of a boy who gulped to help in the war.

War savings stamps were on sale and he had a few money. Three other boys dared him to swallow a fishing worm. He said he would if they'd give him a quarter. He got a stamp.

Farm Topics

Cleanliness First Rule For Farm Creamery

By PROF. W. H. E. REID,
Ohio Department, Missouri College of Agriculture

After all is said, the fact remains that the kind of cream a farmer produces depends entirely on the care it receives on the farm and the care it receives in the creamery. Cleanliness is the first commandment in the dealings of the cream-keeping farmer. Every precaution should be taken to prevent the entry of dirt or other foreign matter into milk at the source. If surroundings are unclean when milking is done, the milk is likely to get into the milk. A clean barn and air free from dust are imperative.

Clipping the cow's flanks and under the line, but wiping with a clean dry cloth helps a lot too in getting rid of loose hair, dust, and dirt. A modern, well-lit stall, one with a pad more than one inch, does much to keep the cow clean. Scrap them with the open scum, open-faced pail with the open scum, that harbor dirt and bacteria. Do not use a closed pail, one with a minimum of exposed surface to needs," according to the civil service commission.

Sanitation Comes First

Always strain the milk before separating. Use a filter type of strainer. If the milk is not clear, it is not fit for use. Do not use a strainer that has been used for anything else. Do not use a strainer that has been used for anything else.

Just rinsing or flushing is not enough. All old water should be rinsed with cold water—that makes the whole job easier—and then washed in hot water with washing powder and a brush. Do not use soap, and never use a dishrag. Then flood all utensils with boiling water. Do not use water from the tap. Do not use water from the tap. Do not use water from the tap.

Cooling is highly important. Germs and mold don't grow rapidly in cool cream. Cool cream immediately and keep it cool until it is sold. A simple cooling tank which provides a flow of cold water around the cream is the most satisfactory.

Even keeping the cream cool with a clean, wet burlap sack tucked under the lid handle will do a fair amount of the hard work for you.

Never mix warm cream with cooled cream. This not only causes a bitter flavor but also hastens deterioration.

It is also important to get cream to market quickly. The quicker you get the cream to market the less time there is for germs and mold to multiply. Deliver or ship cream at least twice a week in winter and three times in summer.

Tainted Dairy Products

Onion, garlic and other milk-tainting weeds cost American dairymen thousands of dollars each year. Those obnoxious pasture weeds impart unpalatable flavors to milk and cream. Taints of butter, milk and cream are strongly objected to by customers everywhere. No matter how good the quality otherwise, butter made from such cream is almost unmarketable.

Since wild onion is one of the most common weeds to appear in pastures, this particular perennial is especially bothersome in early grazing seasons. The best solution of the problem is to avoid pasturing milk cows in the spring and to handle the pasture so as to give grasses opportunity to grow by keeping cows off until grass has a good start.

If only weeds pasture is available, the best plan to prevent weeds from becoming a problem is to keep cows in the field for five hours before milking.

Fertilizer Suggestions

In Case There Isn't Manure Available

Manure has no substitute as a general garden fertilizer. However, if the manure is not available, then it will be necessary to furnish plant nutrients in the form of chemical fertilizers. On soils of average fertility, complete fertilizers may be used safely at the rate of one ton per acre, if applied broadcast. If applied in the furrow, the application should not be greater than 1,000 pounds per acre.

IMPROVED INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST,
Of the Moody Bible Institute of Chicago,
(Revised by Western Newspaper Union)

Lesson for July 19

Lesson subjects and Scripture texts selected and copyrighted by Western Newspaper Union, Inc.

CAIN AND ABEL: A CONTRAST

LESSON TEXT—Genesis 4:1-8

GOLDEN TEXT—By faith Abel offered unto God a more excellent sacrifice than Cain, by which he obtained witness that he was righteous—Hebrews 11:4

The seed of sin is fast growing, and brings forth bitter fruit. The disobedience of Adam and Eve resulted in their being banished from the garden, but that judgment did not terminate the awful plague of sin. We see it in this lesson showing forth in their son, as it has in all the sons of Adam down through the centuries.

It is a dark picture and one which would discourage us did we not know that redemption has been wrought out by "the second Adam," Jesus Christ, our Lord (1 Cor. 15:20-22).

We have here two sons of Adam with their differing personalities. The birth of a child is always an exciting occasion, and one can readily imagine what it must have been when the first boy ever to be born to Adam was born. What joy, what concern for his welfare, what plans for the future! And then, what disappointment and sorrow.

But before speaking of that, let us observe how he and his brother differed in their interests and personalities. It is a surprising thing how completely different two sons of the same family can be.

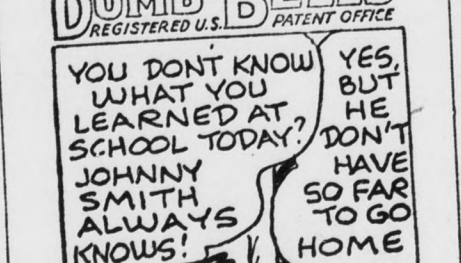

Abel chose the work of a shepherd, much honored in the early history of man. Cain became a tiller of the soil, which has to be more important than the other.

They also had a different viewpoint on worship. Cain was a religious man. He apparently was the first to worship, but he came in the spirit of one who recognized God only as his Creator, the one who gave him his home. Abel came with a different spirit. He offered a sacrifice, the need of a covering for sin (cf. Gen. 3:21). It was more than a sacrifice; it was a plea for forgiveness.

The Lord's acceptance of Abel's sacrifice made Cain angry (v. 5). Here again we see the difference in their hearts. Cain was not interested in worship. He was not interested in God. He was interested in his own feelings.

Jealousy led to anger, and anger (as it often does) led to murder. The deceitfulness of Cain's heart is shown by the callous easiness of his reply to God concerning his murdered brother. His sin brought God's question. It always does. Do not assume that you can hide from Him. It has been suggested that committing sin is like touching a burglar alarm—the bell rings, and one must answer for his act.

I my brother's keeper? This is the perfect expression of the selfish and indifferent attitude of the world. Human beings are regarded as simply those to be exploited, beings upon whom they can rely for their own benefit. To make money, man is willing to destroy a fellow man. So God shows mercy, forbidding the judgment of men upon Cain. Murder belongs to God. It is the responsibility of judging and punishing murder by God (Gen. 9:6).

DUMB BELLS

YOU DON'T KNOW YES BUT HE LEARNED AT SCHOOL TODAY

By HAROLD L. LUNDQUIST,
Of the Moody Bible Institute of Chicago,
(Revised by Western Newspaper Union)

LESSON TEXT—Genesis 4:1-8

Farm Soldier Boy Smashes Record

WASHINGTON.—American soldiers who only a few months ago were farm boys or bank clerks, are the world's best marksmen. U. S. warplane pilots are proving marksmen in dogfights every day. A long-established coast artillery marksmen are the world's best marksmen. A Florida farm boy who had the habit of sighting along the barrel of his 12-gauge cannon and blowing targets out of the Gulf of Mexico.

There must be reason why man for man, weapon for weapon, our boys are outshooting every other nation's marksmen. The answer dates back to our frontier heritage only a few generations ago, comes his-and-miss to the World War and then is an open book from 1917 to today. General Pershing set the pace with a cable from France when he instructed the army to have the men shoot in process of learning about. Since then all has been done to encourage the American soldier to train himself to be a superior marksman.

A training system was evolved by the United States army that has no equal. It has been limited by other armies but Russia alone has recently copied the nation of our training technique with extensive national competition. While other nations restricted civilian use of firearms, we sponsored national rifle matches. It's paying off today. Our average 18-year-old, coming into the army, knows more about firearms than most foreigners ever knew in civilian life. Very soon after he draws his equipment, the American soldier receives the world's best marksmanship training. He takes it to easily. Oddly, he or she draws his brother, our army stands alone in its emphasis on expert shooting; our soldiers alone are training to always shoot to kill a definite target.

Nelson Garrett, who enlisted in the U. S. Navy two weeks ago, says that he is stationed at Camp May, N. J., and that he enjoys reading the home county paper.

A card from Pvt. Kermit Peultette reports that he is stationed at San Francisco, California.

This paper is now going each week to nearly 100 Alphonso (this is the name of the man in the service, is that loved one of yours on our mailing list?)

Spencer Garrett Jr. and Braxton Garrett, of Baltimore spent Tuesday night with their parents.

Miss Abbie Covington, of Richmond, is spending this week with relatives in Lynchburg.

Mr. and Mrs. J. J. Chermault spent the week-end in Radford visiting Mr. and Mrs. William Carter.

Mrs. Clarence W. Perkins, of Richmond spent the week-end with her parents, Mr. and Mrs. Walker O'Brien.

Miss Edna Chermault was a guest of her parents Friday evening.

Mrs. Johnny Carmichael spent Tuesday with Mr. and Mrs. J. J. Chermault.

Friends are sorry to hear that Miss Annie Carmichael is sick. We wish her a speedy recovery.

Mr. and Mrs. Everett Conner and children spent Saturday afternoon with Mr. and Mrs. G. F. Abbott.

Wasted money is wasted lives. Don't waste precious lives. Every dollar you can spare should be used to buy War Bonds. Buy your ten per cent every pay day.

Miss Sue T. Davidson, of Spout Spring was among the dinner guests of John Gunter last Thursday.

Mr. and Mrs. Winston Thornhill, of Newport News were visiting relatives in this neighborhood Sunday.

Luck at the Drawing

FAVORS CANDIDATE TAYLOR

ALLEGHANY, N. Y.—Charles A. Shafer, retired from the navy, is in the same way, he won it by a boy drawing his name from a hat.

Shafer and his opponent, George Kahn, each received 98 votes in the village election. Officially reported to the boy and had to break the tie. Shafer drew the winning number, 98, and Kahn drew 97.

Guarding Machinery

Because of the national war emergency program is expected to make it increasingly difficult to obtain new machinery and repair parts, it is suggested that farmers keep their implements in good shape.

Farmers can prolong the life of their machinery by observing the following rules: 1—Store implements in a dry place. 2—Overhaul machinery periodically. 3—Keep equipment in good adjustment. 4—Protect wood surfaces with paint.

Our fighting men are doing their share. Here at home we can help them by buying War Bonds. Buy your ten per cent every pay day.
